

For Bio 1 can we use this orientation and microscope but add one of the smaller microbes that got covered up by the label - maybe something like this?

Feel free to adjust color choices for the words/boxes too - I was just playing around) and copy and paste was easiest for me to try and get a feel for what it might look like!

Seeing the classes all together in order on the previous page, I felt like there was maybe too much dark black blue between physics 2, biologies, chemistry, and earth science— could we lighten the background on Earth Science or make a change there?

What do you think about using the Africa view Earth from the calendar folder and putting the label all horizontal like here? Maybe just make a couple adjustments to color choice since the line is close in tone to the desert colors?
